

Modulating damper actuator for adjusting dampers in technical building installations

- Air damper size up to approx. 0.4 m²
- Nominal torque 2 Nm
- Nominal voltage AC/DC 24 V
- Control Modulating DC (0)2...10 V
- · Position feedback DC 2...10 V
- · With connecting terminals

Technical data

lectrical	1 4-4-

Nominal voltage	AC/DC 24 V	
Nominal voltage frequency	50/60 Hz	
Nominal voltage range	AC 19.228.8 V / DC 19.228.8 V	
Power consumption in operation	1 W	
Power consumption in rest position	0.5 W	
Power consumption for wire sizing	1.5 VA	
Connection supply / control	Terminals 1.5 mm ² Cu wire or 1.0 mm ² Cu strands (4-wire)	
Parallel operation	Yes (note the performance data)	

Functional data

Parallel operation	Yes (note the performance data)	
Torque motor	Min. 2 Nm	
Positioning signal Y	DC 010 V	
Positioning signal Y note	Input impedance 100 kΩ	
Operating range Y	DC 210 V	
Position feedback U	DC 210 V	
Position feedback U note	Max. 1 mA	
Position accuracy	±5%	
Direction of motion motor	cw rotation	
Direction of motion note	Y = 0 V: right end stop, position 0	
Manual override	with magnet	
Angle of rotation	95°, fixed setting	
Running time motor	75 s / 90°	
Sound power level motor	35 dB(A)	
Spindle driver	Universal spindle clamp 612.7 mm	
Position indication	Mechanically, pluggable (with integrated magnet for gear disengagement)	
Protection class IEC/EN	III Safety extra-low voltage	

Safety

	magnet for gear disengagement)	
Protection class IEC/EN	III Safety extra-low voltage	
Protection class UL	UL Class 2 Supply	
Degree of protection IEC/EN	IP20	
Degree of protection NEMA/UL	NEMA 1, UL Enclosure Type 1	
EMC	CE according to 2004/108/EC	
Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14	
Certification UL	cULus according to UL 60730-1A, UL 60730-2-	
	14 and CAN/CSA E60730-1:02	
Mode of operation	Type 1	
Rated impulse voltage supply / control	0.8 kV	
Control pollution degree	2	
Ambient temperature	-3050°C	
Non-operating temperature	-4080°C	
Ambient humidity	95% r.h., non-condensing	
Maintenance	Maintenance-free	
Weight	0.21 kg	

Weight

• The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.

Safety notes

Damper actuator, Modulating, AC/DC 24 V, 2 Nm, With connecting terminals

Safety notes

- Outdoor application: only possible in case that no (sea)water, snow, ice, insolation
 or aggressive gases interfere directly with the actuator and that is ensured that the
 ambient conditions remain at any time within the thresholds according to the data
 sheet.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The mechanical end stops for limiting the angle of rotation may only be removed for adjustment. They must always be mounted during operation.
- The device may only be opened at the manufacturer's site. It does not contain any
 parts that can be replaced or repaired by the user.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section, the design, the installation site and the ventilation conditions must be observed.
- The device contains electrical and electronic components and must not be disposed
 of as household refuse. All locally valid regulations and requirements must be
 observed.

Product features

Mode of operation The actuator is connected with a standard modulating signal of DC 0...10V and drives

to the position defined by the positioning signal. Measuring voltage U serves for the electrical display of the damper position 0...100% and as slave control signal for other

actuators.

Simple direct mounting The actuator is mounted directly on the damper spindle (\angle 6...12.7 mm) with an

universal spindle clamp and then secured with the anti-rotation device supplied, to prevent it from rotating.

provent it nom rotating

Manual override Manual override with magnet possible (the gear is disengaged as long as the magnet

adheres to the magnet symbol). The magnet for gear disengagement is integrated in

the position indication.

High functional reliability
The actuator is overload protected, requires no limit switches and automatically stops

when the end stop is reached.

Adjustable angle of rotation Adjustable angle of rotation with mechanical end stops.

Hidden synchronisation If the actuator drives to the lower end stop during ongoing operation, then it performs a

synchronisation of the positioning signal at DC 2 V. This ensures that the signal range also corresponds to the effective functional range in ongoing operation. The bottom end stop is actively approached as soon as the positioning signal is < DC 2.1 V. The actuator drives to the new specified position as soon as the positioning signal is once

again > DC 2.3 V.
